**THE MILITARY-POLITICAL COUP OF THE NINTH OF SEPTEMBER
1944 (65 YEARS OF THE EVENT)**

(Summary)

According to the author “On account of ideologically-doctrine reasons the facts about the event, the personages involved and the assessment of the event during the long decades of the communist rule were subject to elusive manipulations and silence”. The end of the 80-ies brought new and till then unknown to the history science facts. The immediate participants and witnesses in their old age declare their opinion, confirm some and argue upon other of their own previously presented information. That gives serious reason for an attempt to explain the events before, around and in the time of the military-political coup of ninth of September in a way, which, even if does not definitely explain all that was attempted and occurred around that important historical event, than at least lessens the stability of the mythology built up to now around it.
