**HISTORY AS A GALLERY OF RENAISSANCE PAINTINGS: ON THE
OCCASION OF THE ANNIVERSARY OF RUMYANA RADKOVA**

(Summary)

The text is dedicated to the 80th anniversary of Correspondent member of BAS, ScD. Romyana Radkova, a prominent researcher of Bulgarian Revival. The scientific biography of the researcher is briefly presented and a concise historiographical overview of the most significant of her works is made. For a better presentation of her scientific works, parallels with works of artists have been used: the works devoted to historical and geographical objects are compared with landscapes, biographical works with portraits of individual national revivalists, and the research on social groups with collective portrait compositions.
